

string

```
graph BT; A[CartWheel::StartState] -.->|name_| B[string];
```

The diagram illustrates a relationship between a variable and a data type. At the top, a white rectangular box with a gray border contains the text 'string'. Below it, a purple arrow points upwards towards the 'string' box. The arrow's shaft is dashed, and the label 'name\_' is positioned to its right. The arrow originates from a gray rectangular box at the bottom with a thick black border, which contains the text 'CartWheel::StartState'.

name\_

CartWheel::StartState
